SPORTS CLUB WEBSITE

SUBJECT-INTERNET PROGRAMMING  
LABORATORY

SUBJECT CODE- CSE 326

SUBMITTED BY-SAUMYA SINGLA(48)  
VISHAL KUMAR(47)

SUBMITTED TO-MR. MIR SALIM UI ISLAM

# INTRODUCTION

Web designing has been an essential part of computer science. HTML, CSS and JavaScript are being used for such purpose. We are glad that our university has provided opportunity to learn web designing. As a part of our internet programming laboratory, we were assigned a project to develop a sports club website. So, by putting forward our knowledge and skills, we have developed a mini html project on sports club.

# TECHNOLOGIES USED

1.HTML-Hyper Markup Text Language- We used the basic HTML concepts to develop the basic layout of our website.

The basic concepts used by us were link, division, basic identifying tags such as address etc.

Apart from that we also used paragraph and heading tags which were essential for the basic layout.

2.CSS-Cascading Style Sheets- We used CSS concepts for adding styles to our website which eventually made our website look attractive and classy.

We used properties such as width, height for defining the parameter of the images. We used margins and padding tags also.

We also used colour and font for the text used in the website.

Apart from this, iframe, ar border radius were also used.

# SCREENSHOTS OF PROJECT

```

<!DOCTYPE html|
<html>
<head>
  <title>CSE326 SPORTS CLUB</title>
  <link rel="stylesheet" href="style.css">
</head>
<body>
  <div class="social">
    <div class="socialdiv">
      
      
      
      
    </div>
    <div class="email_contact">
      <span id="email"><a href="mailto:cse326@email.com">cse326@email.com</a></span>
      <span id="contact">+911234567890</span>
    </div>
  </div>
  <div class="topbar">
    <div id="logo">
      
    </div>
    <div id="menu-bar">

    <b><u>Join Our Club and start your training now!!</u></b>
    <p><u>About the club</p></u></b>
    Our Sport Club program offers the community an opportunity to participate in a
    broad variety of sports and recreational activities. All programs are based on ones interest and
    designed to enhance the experience by creating an environment where people can unite in
    diverse groups to achieve common goals and objectives while encouraging healthy lifestyles. Sport
    Clubs provide a valuable learning experience through student involvement and also build in leadership development.

# FLOW OF WORK

Contribution of every team member holds an important role in proper workflow and execution of a project. Me and my groupmate Vishal ensured that both of us collaborate for the project and make it a success.

We both sat together and discussed on the basic layout of the project.

Vishal took the responsibility for holding the html basic layout and I ensured the proper CSS workflow.

All the frontend work on html was done by Vishal. I did the styling work by using CSS.

This way both of us ensured that we contributed equally and invested equal portions of mind in the project.

# CONCLUSION

In order to conclude, we would like to thank our faculty Salim sir for providing us the opportunity to invest our skills in this project.

We would like to acknowledge his assistance and all the support provided by him.

We are glad that our project is a success. We both enjoyed a lot working together and putting our minds together for the project.

Thank You.
